PART ONE: READING COMPREHENSION (15 Marks)

A) Read this text carefully and answer the all questions that follow. (12 Marks)

Should circuses use animals?

The use of animals in circuses has been an important issue over recent years, and several countries have already banned this practice. Apart from the pressure from the public to stop cruelty to animals, an important aim of the ban is to stop children (who after all, make up a major part of the typical circus audience) from making a connection between wild animals and entertainment. An increasing number of circuses are therefore focusing on putting human performers on the stage. The city of Paris, for example, has promised significant financial support for circuses which agree to become animal-free.

Although historically, circus animals were often very badly treated, in recent years that hasn't always been the case. In the UK, for example, before a 2020 ban on using wild animals, circuses had to follow strict laws which meant that they cared as much about animal protection as most zoos. Circus animals had to be visited by vets six times every year, and their diet and accommodation were strictly controlled. As a result, circus animals often had healthy, comfortable lives.

There is certainly a debate to be had about exploiting animals for our own entertainment. However, to say that all circuses treat animals badly is too simple an argument.

1-What is one major reason why some countries have banned animals in circuses?

2- Which city has promised financial support to circuses that become animal-free?

3-What does the underlined pronoun `` *they* `` refer to?

4- True or False: The text suggests that all circuses throughout history have treated animals well. ()

5- What is the author's final conclusion about the argument that "all circuses treat animals badly?"

.....

6- Quote the sentence which shows that the ban on circus animals is not only about preventing cruelty, but also about education and children's perception.
